INTRODUCE LITTLE INTERCOLLEGE INTERCOLLEGE		Module Title			Introduction to Politics							

Module aims and objectives

This module introduces the study of politics and is intended as a practical guide to some of the main concepts and vocabulary of political science. The module provides an introductory guide to important themes and issues related to the study of politics, such as the state, regime types, and political change and behaviour. It also introduces learners to some of the study skills that they need to complete assignments and assessments in the area of politics. This module is relevant to MIPLOs 1, 2, 3, 4. This module will introduce learners to political and social science research methods. It will provide learners with a foundational knowledge of the theoretical dimensions of conducting research in the field of political and social sciences. A variety of qualitative and quantitative research methods, data sources and methods of data analysis are explored.

Minimum intended module learning outcomes

On successful completion of this module, learners should be able to:

- 1. Identify and explain some of the core concepts used in political analysis. (MIPLO 1)
- 2. Contrast different political systems and forms of political power. (MIPLO 1, 2)
- 3. Demonstrate an appreciation of arguments about politics and the merits of different political systems. (MIPLO 1, 2)
- 4. Distinguish between different political institutions and electoral systems and demonstrate an understanding of the structure and functions they perform at Irish and European level. (MIPLO 1, 2, 4)
- 5. Demonstrate practical skills and competencies in reviewing texts of political analysis (MIPLO 3, 4)
- 6. Have an informed understanding of quantitative and qualitative paradigms, and the link between theory and practice in social research. (MIPLO 1, 2, 4)

Rationale for inclusion of the module in the programme and its contribution to the overall proposed Programme Learning Outcomes

There is a significant focus in this module on the development of practical skills. The combination of practical skills with key concepts and theories provides a strong basis for the transfer of knowledge, skills, and competencies to other modules, and presents an opportunity for integrated assessment strategies that encourage learner engagement and highlight the connection between theory and practice and will foster a more in-depth understanding of the complexity of the relationship between political institutions and civil society. The Research Assignment will be included as part of the final E-Portfolio in the Pedagogy module.

The module is relevant to all programme modules and helps learners to develop a deeper understanding of the individual module content.

Information provided to learners about the module

College Prospectus specifies module name, stage and ECTS. College website and programme handbook to contain (in addition to above) short description of module content, module learning outcomes, prerequisite modules, and assessment mechanisms. Module Moodle Page and Module Handbook to contain (in addition to above) schedule of classes and topics, detailed assessment information with titles and submission dates, full bibliography, and list of learning resources.

Module content, organisation and structure

Indicative module content:

- 1. Thinking about Politics
- 2. Foundational Concepts in Politics
- 3. Participation and Public Opinion

- 4. Power and the Legitimation of Authority
- 5. Ideologies and the Political Spectrum
- 6. Political Representation and Political Parties
- 7. Electoral Systems and Elections: Elections and Appointment of the Houses of the Oireachtas; The Northern Ireland Executive and the European Parliament
- 8. The State
- 9. Democracy and Democratic Government
- 10. Political Institutions of Ireland and the European Union
- 11. International Politics
- 12. Researching Politics & Methods of Political Analysis (Introduction to Quantitative and Qualitative Research; Methods of Collecting and Analysing Data)

Module teaching, learning and assessment strategy

The module is focused on the development of learner capacity to acquire self-awareness, to engage in critical reflection and to demonstrate a commitment to inclusion and ethical. Consequently, the teaching and learning strategy adheres to the philosophy and practice of transformative, collaborative and critically reflective learning approaches, inclusive of the following methods:

Lectures, peer learning achieved through face-to-face classroom discussion, role-play and participation in classroom exercises, case study analysis, video Lectures, discussion forums, case studies and group exercises. Learners will, in small groups, break down the material in tutorials for greater examination of the issues. Prescribed readings will be used to encourage engagement by learners and will provide a basis for formative assessment or assessment for learning (<u>Carlow College Teaching and Learning Strategy</u>).

Module summative assessment strategy

This module will be assessed by two assignments.

Work-based learning and practice-placement

N/A

E-learning

Use of virtual learning platform, access to weekly online reading material and powerpoint presentations and a range of online learning materials.

Module physical resource requirements

The module will be delivered through a combination of workshops and asynchronous learning. Requirements include projectors, whiteboards, audio-visual equipment, and WiFi. Access to the Learner Gateway and Library resources are also a requirement.

Re-Assessment Procedures

All details regarding compensation, penalties for late submissions, policy around repeat examinations/assessments, pass standards at programme, module, and assessment level, max completion period are outlined in the College's <u>Regulations in Relation to Assessment and Standards</u>. Where a learner does not successfully complete the module, they will have the opportunity to repeat the assessment in line with the College's <u>Regulations in Relation to Assessment and Standards</u>.
