<b>7.3 Indicative Module Content, Organisation and Structure</b>
<p><u>Rationale for Inclusion of the Module in the Programme</u></p> <p>This module is closely linked with Practice Placement and Portfolio 1, assisting the learner to deepen the knowledge and learning acquired while on placement. The Programme Learning Outcomes are informed by the Standards of Proficiency for Social Care Workers – CORU 2017.</p> <p>This module aims to build on the importance of self in care work as identified on placement. It will enable the learner to evaluate the effect of their own characteristics, values and practice during interactions with service users and be able to critically reflect on this to improve practice. The aim of the module is to develop the learners’ capacity to engage in professional social care practice in a variety of social care contexts.</p> <p><u>Module Content, Organisation and Structure</u></p> <p>The module content is focused on the development of insight and practice through critical attention to theories, principles and assumptions and the relationship between theory and practice. It will build on work completed in this area at stage 1. The module content supports the learner in developing reflective practice skills by utilising placement experience to inform their professional development</p> <p><b>Structural and delivery issues:</b></p> <ul style="list-style-type: none"> <li>• Social care contexts Part 2</li> <li>- Working with older people – policy and services</li> <li>- Domestic violence - policy and services</li> <li>- Youth work and aftercare – policy and services</li> <li>- Introduction to The Health Promotion Model</li> </ul> <p><b>Professional practice issues</b></p> <ul style="list-style-type: none"> <li>• Key theories of loss - meanings and implications</li> <li>• Introduction to Trauma-informed practice</li> <li>• Responding to ‘Behaviours that Challenge’</li> <li>• Supervision in Social care</li> </ul>

<b>7.6 Application of programme teaching, learning and assessment strategies to this module</b>
<p><u>This module aims to</u></p> <ul style="list-style-type: none"> <li>• Promote deep learning through learner engagement, interactivity, flipped classrooms, groupwork.</li> <li>• Support inclusive teaching using templates and ‘tools’ from the professional Social Care context.</li> <li>• Provide opportunities for collaborative learning where students are facilitated to become active learners through reflective practice.</li> </ul> <p><u>Assessment</u></p> <p>The objective is to employ a wide range of different assessment instruments. The reflective-practice-based exercise and poster presentation allow the student to become more aware of their own professional development. By articulating that through the poster presentation the group learning is enhanced. Students are asked to explore the implications of the Assisted Decision –making Act for their practice – they can choose a practice setting and supported-person group of their choice.</p> <p>End of module examinations. When assessing for the programme, the three aspects of knowledge, skills and competencies are considered; as are the five domains of proficiencies stipulated by the Health and Social Care Professionals Council (CORU, 2017).</p> <p>This module contains MUST PASS assessments.</p>
